Genesys Administrator Extension Help

?

1. **IPsec** — - IPsec (Internet Protocol Security) is a suite of protocols that provide secure communication over an IP network. It is used to protect data in transit and ensure confidentiality, integrity, and authentication. IPsec is commonly used in VPNs (Virtual Private Networks) to create secure tunnels between devices.
2. **SSL/TLS** — - SSL (Secure Sockets Layer) and TLS (Transport Layer Security) are cryptographic protocols that provide secure communication over a network. They are used to establish a secure connection between a client and a server, ensuring data confidentiality and integrity. SSL/TLS is commonly used for securing web traffic (HTTPS) and email communication (SMTPS, IMAPS).
- **Configuration Database** — - A database that stores configuration information for network devices, such as IP addresses, subnet masks, and routing protocols. It is used to manage and configure network devices centrally.
- **Mozilla Firefox** — - Mozilla Firefox is a web browser developed by Mozilla Corporation. It is known for its focus on privacy and security, and it supports a wide range of web standards and extensions.
- **Explorer** — - Microsoft Internet Explorer is a web browser developed by Microsoft. It was the dominant browser for many years but has been largely replaced by Microsoft Edge.
- **DST** — - DST (Daylight Saving Time) is a practice of adjusting the clock forward by one hour during the summer months to extend daylight hours. It is observed in many countries, but not all.

DST

- 00 00 00 00— - 00 0 0000 DST 0 00 0 00 0000.
- 00 00 00 00 00(00)— - DST 0 00 0 0000 0000. 0 000 0 00 00 00 00 0000 000.
