## About This Software

Interactive Insights for iWD is the Genesys product that serves as the presentation layer for the intelligent Workload Distribution 8.0 Data Mart. Interactive Insights for iWD leverages the ad-hoc analytical capabilities of Business Objects Enterprise (BOE) XI 3.1 software. For the Genesys 8.0 release, the Genesys Interactive Insights for iWD CD contains the Interactive Insights for iWD 8.0 Universe—the semantic layer which defines metrics and dimensions in business-friendly terms—and a set of standard reports based on the data supplied by your iWD 8.0 Data Mart.

You can easily customize the Interactive Insights for iWD reports (using Web Intelligence) and measures (using Designer)—these applications are provided as part of the BOE XI 3.1 suite.
